

Panvisus COMPACT RONDO

refraction unit with rotating table for two instruments,
with drawer with tray for 158 trial lenses

The comfortable drawer with wooden tray for 158 trial lenses, integrated in the rotating table for two instruments, available with either fixed height or electric up/down movement; the compact sizes of the unit with a width of only 105 cm; the great stability and the ease of use make Panvisus COMPACT RONDO one of the best units for small examination rooms as well as for the most exigent specialists.

Main Features:

- Rotating table for two instruments (instruments must be installed on table top with chin rests in opposite directions), with either fixed height or 15 cm electric up/down movement and provided with two power supply sockets, settable at either 6V or 7.5V or 12V or 230V.
- Electromagnetic locking of both rotating table and table arm.
- Chair mod. PRIMA with electric up/down movement from 50 to 65 cm, fixed back rest, fixed arm rests, either with or without tip-up foot rest.
- Overhead lamp and chart projector support arm.

Main Options:

- Counterbalanced phoropter arm.
- Version with chair and unit in inverted position (left handed unit).
- Either GLORIA (fixed back rest, fixed arm rests, tip-up foot rest) or LIBERTY (fixed back rest, tip-up arm rests, tip-up foot rest) or SONNE (reclining back rest, tip-up & lockable arm rests, tip-up foot rest, with/without head rest) or ALLES (reclining back rest and with leg rest, tip-up & lockable arm rests, fixed foot rest, with/without head rest) chair, instead of PRIMA chair.
