

# OPHTHALMIC CHAIRS

**A wide range of ophthalmic chairs to satisfy the needs of the largest clientele!**

Harmonious design, elegance, sturdiness, stability, reliability are only some of the valuable characteristics of the electrical height adjustable chairs, produced by F.I.S.O..

All F.I.S.O. chairs are equipped with a motorised height adjusting mechanism, based on a silent and powerful electric motor, providing 15 cm elevation (from 50 to 65 cm), by acting on a foot-switch control. The nice and sturdy base, in laminated wood, assures great stability, even in case of heavy patients. Chair coverings are available in many different colours.

The wide range of available models satisfies the needs of the largest clientele: from opticians and ophthalmologists to ENT doctors and doctors of many specialities of medicine.

## Available models and related features:

- **PRIMA** ophthalmic chair is a very nice and comfortable chair, provided with fixed back, fixed arm rests, 360° lockable rotation and optional tip-up foot rest.
- **GLORIA** ophthalmic chair is a modern and nice chair, provided with fixed back, fixed arm rests, tip-up foot rest, 360° lockable rotation.
- **LIBERTY** ophthalmic chair is a professional chair, provided with fixed back, tip-up arm rests, tip-up foot rest, 360° lockable rotation.
- **SONNE** ophthalmic chair is characterised by a nice and elegant look that enhances the prestige of any room. It is provided with: reclinable back with pneumatic mechanism for automatic return to vertical position, tip-up and lockable arm rests, tip-up foot rest, 360° lockable rotation. The optional head rest is provided with both backward/forward and up/down movement.
- **ALLES** ophthalmic chair satisfies all needs of ophthalmologists and ENT doctors. It is easily and quickly convertible into bed and can be used for tonometry, dressing and small surgical operations. By pushing a lever, it comes back automatically to the vertical position by means of a pneumatic mechanism. Furthermore it is provided with: tip-up and lockable arm rests, foot rest, 360° lockable rotation. The optional head rest is provided with both backward/forward and up/down movement.
