

## **HERCULES with Double Rotation Top for Two Instruments**

### **The only truly workable and functional disability unit ever produced!**

The rotational movement and motorised elevation of the double table is based on catering for wheel chair patients. Movement of the optional motorised chair has been made easier by virtue of the optional embedded wheels on the underside of the chair base. Alternatively your existing patient chair can be utilised.

The Hercules offers practitioners a truly all round accommodative solution and does not compromise on space at only 1.2 meters in width.

#### **Features:**

- Table top for two instruments with manual rotational movement and manual lock, provided with two power supply sockets settable at either 6V or 7.5V or 12V or 230.
- Table top height range: art. 96HYWC-D from 72 to 92 cm; art. 96HZWC-D from 78 to 98 cm; art. 96HWC-D from 88 to 108 cm.
- Overhead lamp with halogen bulb.
- Height adjustable chart projector support arm.

#### **Options:**

- Counterbalanced phoropter arm.
- All range of F.I.S.O. motorised chairs complete with foot switch control. The chair base can be optionally provided with embedded wheels.
